Applications for BLÜCHER Systems

Industrial

processing/production in:
food and beverage, biotechnology,
pharmaceutical, chemical,
automobile, IT industries

Commercial

hospitals, hotels, shopping malls,
airports, commercial kitchens

Marine

cruise ships, yachts, ferries,
naval vessels, cargo vessels

Drawing on more than 50 years' experience as an industry leader, BLÜCHER designs and manufactures piping, drains, and channels that benefit from the advantages of stainless steel:

- Hygienic – Smooth surfaces inhibit bacterial growth and support the need for clean conditions in food processing, beverage production, kitchen areas, and changing rooms.
- Durable – Stainless steel can withstand high temperatures and is highly fire-resistant.
- Strong and lightweight – All BLÜCHER products are durable and easy to handle and install.
- Easily maintained and visually appealing – Components are resistant to cleaning chemicals and tolerant of steam cleaning.
- Safe – Stainless steel is 100% recyclable and non-toxic, making it an environmentally friendly choice.

Stainless Steel Pipes, Drains and Channels

BLÜCHER® Pipe

BLÜCHER® Channel

BLÜCHER® Drain

Tough. Lightweight. Stylish

BLÜCHER Pipe is an extensive line of stainless steel drainage pipes and fittings that can be used above as well as below ground.

- Easy to install push-fit drainage pipework system exceeds the demands of the strictest user and statutory requirements.
- Smooth inner surface prevents bacterial growth and blockages.

BLÜCHER Channel provides a wide variety of drainage channels:

- Gratings and filter baskets, most of heavy-gauge stainless steel for stability and durability
- Resistant to the discharge of liquids at temperatures as high as 248°F (122°C)

In industrial and commercial environments, BLÜCHER Channel advantages include:

- Hygienic frames reinforced with synthetic resin infill
- No inside cavity corners or sharp corners
- Smooth surface finish
- Grating lock system
- Gratings for any load class

DRAINS

BLÜCHER Drain includes light- to heavy-duty drains for all floor types. This product line is designed to meet the strictest sanitary and hygienic requirements, with:

- No burrs or sharp edges
- No corners or cavities inside the drain
- Hygienic backfilled frame edge
- Gratings available for any load class
- A sediment basket or sand bucket to catch debris

FOOD AND BEVERAGE

BLÜCHER provides drainage solutions for food processing and beverage production facilities.

- Smooth, easy-to-clean surfaces for hygienic drainage
- Self-cleaning
- Excellent flow capacity

The BLÜCHER HygienicPro® line includes drains and channels specifically tailored for the food processing and beverage production industries.

BIOTECH AND PHARMACEUTICAL

BLÜCHER provides safe drainage solutions for removing water from production areas, laboratories, utility rooms, kitchens and changing rooms in the biotechnology and pharmaceutical industries.

- Excellent hygienic properties
- High flow capacities
- Minimal maintenance

COMMERCIAL

BLÜCHER drainage systems are installed in hospitals, hotels, shopping malls, airports and similar construction where hygiene is especially important.

- Easy-to-clean and maintain components – including piping, drains, and channels – promote hygienic conditions.
- Stainless steel is especially durable, withstanding the drainage requirements of commercial settings that serve a large number of people.

MARINE

For more than 30 years, BLÜCHER has been the sanitary discharge system of choice for new and retrofitted vessels.

- More than 3,275,000 yards of piping has been installed in more than 900 vessels.
- BLÜCHER drainage solutions can be found in cruise ships, ferries, luxury yachts, naval vessels, cargo vessels, off-shore platforms and offshore vessels.

Combining know-how, dedicated service, and common sense, BLÜCHER® designs and manufactures high quality stainless steel solutions for commercial, industrial, and marine markets worldwide.

BLÜCHER products are manufactured in accordance with ASME A112.3.1 and the Uniform Plumbing Code (UPC). N. American certifications and listings can be found through the International Association of Plumbing and Mechanical Officials (IAPMO), and NSF International.
