Watts and ATS Host Educational Engineering Event at the Hockey Hall of Fame

North Andover, MA – November 2, 2017 – Watts in partnership with ATS recently welcomed 100 specifying engineers and facility managers to an engineering event at the Hockey Hall of Fame in Toronto.

In keeping with the theme for the evening, "Your Connection to Innovative Water Solutions," attendees were provided an overview of the depth and breadth of the Watts extensive line of flow control, water safety, water filtration & treatment, drainage, and heating & hot water products, as well as its integrated system solutions, and design resources.

Many guests took the opportunity to participate in educational seminars and voice their opinions on current products and ideas for future products and services.

For more information, visit Watts.com.

#1 Event attendees learned about the challenges of Rainwater Harvesting and viable solutions for meeting them.

#2 One of the products highlighted at the engineering event was BLÜCHER's HygienicPro stainless steel drain, which is specially designed to minimize contamination risk for ultra-hygienic applications.

About Watts

Founded in 1874, Watts designs, manufactures, and sells an extensive line of flow control, water safety, water filtration & treatment, and drainage products for the commercial, residential, and institutional markets. For more information, visit Watts.com.

About ATS Spec

ATS Spec is the only online, time-saving, Specification Information System that directly connects the Design community and their building spec requirements with the leading manufacturers' products. With ATS Spec, Designers may conveniently review manufacturers' product details and build customized and accurate specification packages: Plumbing Fixture Schedules, Bathroom Accessories Schedules, Interior Finish Schedules, Cut Sheets, Owner Presentations, CSI Master Format, and much more. Packages are complete with images, written specs, 3D BIM families, budget pricing, and much more. To learn more about ATS Spec, please visit www.atsspec.net or call directly at 1-800-245-1880.
